Asunto	DUMPING Y SALVAGUARDIAS - Solicitud Revisada
Destinatarios	jaserrano@araujoibarra.com;
C.C.	
Fecha Creación	23-10-2024 15:51:351
Fecha Envío	23-10-2024 15:51:351

Contenido	Señor(a) peticionario(a), se ha revisado en el sistema de información de Dumping y Salvaguardias del Ministerio de Comercio, Industria y Turismo su solicitud con el número de radicación 49 en la categoría de DUMPING. A continuación encontrará el listado de requerimientos, por favor, ingrese al sistema y de respuesta a los mismos. La fecha límite para dar respuesta a los requerimientos de la solicitud es 22-11-2024. En el anexo 17 de la solicitud de apertura de la investigación se indica que, “Cuando la cantidad declarada está expresada en unidades de Longitud (piezas), se procede a calcular el peso teórico para cada producto identificado en la descripción completa, buscando los valores del diámetro y la especificación de clúster (EMT, IMC, RMC) correspondiente a cada producto, desde las fichas técnicas por producto Familia, para obtener así el peso mínimo del tubo expresado en kilogramos, el resultado se multiplica por las piezas declaradas en cada producto y se divide entre 1.000, obteniendo el peso teórico en toneladas.” Al respecto, para el cálculo del peso teórico, se requiere mayor claridad sobre la metodología utilizada cuando la cantidad declarada está expresada en unidades de Longitud (piezas), en razón a que en la descripción de la mercancía de las declaraciones de importación se relacionan diferentes diámetros, Ejemplo: (REF. 1-1/4 EMT CANT. 420 U ///PRODUCTO. TUBO EMT 1-1/2PULGADAS MEDIDAS 44,20MM X 1,50MM X 3M. DIAMETRO EXTERIOR 29.54MM, DIAMETRO INTERIOR 28.09MM, ESPESOR1.45MM, LONGITUD 3 MT,), mientras en la Norma Técnica de la familia EMT, se encuentran las dos medidas 44.20mm y 29.54mm para asignar el peso mínimo del tubo. De igual manera, se requiere claridad sobre la distribución equitativa de peso total de aquellas declaraciones que no cuentan con información correspondiente a longitud o diámetro en la descripción. De otra parte, tampoco es clara la metodología de utilización de los histogramas de frecuencia para determinar los tubos con características especiales que no se pueden comparar. Aportar listado de las 345 declaraciones de importación, en las cuales la descripción de la mercancía se encuentra de forma incompleta según lo manifestado por ustedes, para las cuales se aplicó el criterio del importador pa0ra identificar el tipo de gama. Aportar nuevamente el "anexo 14 reglamento técnico de instalaciones eléctricas – retie_publico.pdf", por cuanto al consultarlo en el aplicativo no es posible verlo. Aportar de nuevo en forma legible el Anexo 9, que contiene las normas técnicas que define el producto objeto de investigación.

	Allegar las pruebas de laboratorio mencionadas en el Anexo 13, éstas no se encuentran entre los documentos presentados con la solicitud. 3.1. Valor normal 3.1.1. Intervención Estatal Significativa De conformidad con lo establecido en el artículo 2.2.3.7.3.1. del Decreto 1794 de 2020, y con el fin de determinar la intervención del Estado en las empresas chinas del sector del acero, en particular de tuberías de acero y tuberías tipo Conduit: Para tales efectos, al determinar si existe una intervención estatal significativa se requiere: a. Indicar y explicar las políticas, planes y programas del gobierno chino en el sector de acero y de las tuberías objeto de investigación. b. Suministrar razones sociales de empresas chinas productoras de tubos Conduit con intervención estatal del gobierno chino. c. Suministrar información sobre los tipos de financiación que otorga el gobierno chino a las empresas con intervención estatal que producen tuberías Conduit. d. Aportar factores que considere ayudan a demostrar la intervención estatal significativa y su impacto en el sector del acero. 3.1.2. Tercer país sustituto De conformidad con lo establecido en el artículo 2.2.3.7.3.1. del Decreto 1794 de 2020, al momento de escoger el tercer país sustituto es necesario identificar los siguientes aspectos, con el fin de establecer la pertinencia México como país sustituto de la república Popular China: a. Comparar los procesos de producción entre el país investigado y el tercer país sustituto propuesto con el fin de identificar sus similitudes. b. Comparar la escala de producción de las tuberías tipo Conduit entre el país investigado y el tercer país sustituto propuesto. c. Comparar la calidad de los productos. d. Desde el punto de vista de las exportaciones y basándose en estadísticas fiables, indicar el posicionamiento a nivel mundial del tercer país sustituto propuesto y compárelo con las exportaciones del país investigado, esto con el fin de verificar su pertinencia dentro de la investigación. e. Los demás aspectos que considere que puedan enriquecer la justificación de la

	escogencia del tercer país sustituto, incluyendo entre otros, por ejemplo, información sobre la capacidad instalada, capacidad de producción y capacidad disponible de exportación. En el mismo sentido, al momento de escoger el tercer país sustituto, exponer las razones por las cuales se escoge este país y no otros posibles países sustitutos. 3.1.3. Cálculo del valor normal Con el propósito de completar la información aportada por la empresa peticionaria para determinar el valor normal, se solicita aportar o aclarar los siguientes elementos: a. En el anexo “anexo c_precios_conduit_confidencial.pdf” figura la columna titulada “Fuente del Peso Neto (Kg)” en la cual se indica el peso EMT, IMC dependiendo del producto. Por lo anterior, indique a través de un ejemplo, la manera como se identifica al peso y cómo influye en el cálculo del valor normal. b. Anexe la información correspondiente al cálculo del valor normal incluyendo sus ajustes en formato Excel, para su verificación y valoración. c. En el caso del flete, adjuntar las cotizaciones en versión confidencial. 3.2. Cálculo del precio de exportación a. En razón a que en la descripción del producto objeto de investigación indicado en la solicitud de investigación hace referencia al término “diámetro nominal” y en las declaraciones de importación a “diámetro exterior”, se hace necesario aclarar si dichos conceptos significan lo mismo. b. Indicar si las tuberías tipo Conduit objeto de investigación, vienen sólo en las referencias EMT, IMC y RMC. c. Si en las declaraciones de importación no es posible identificar dichas referencias, de que otra forma se podría identificar el producto objeto de investigación. d. Para cada referencia de tubería Conduit identifique el diámetro correspondiente. e. En el Anexo 17 de la solicitud de apertura de la investigación se indica lo siguiente: “(…) en la descripción completa de la mayoría de las declaraciones de importación, correspondientes al 88,9% del volumen de total de importaciones analizado, se encontró el tipo de producto (Tubo o Tubería Conduit), diámetro y familia o clúster (EMT, IMC O RMC), permitiendo así clasificar en función del diámetro que produce la peticionaria: a) Gama Tenaris Tubocaribe: Tubería Conduit EMT de diámetros comprendidos entre 1/2” y 4”, Conduit IMC de diámetros comprendidos entre 1/2” y 4”, y Conduit

	RMC (Rigid) de diámetros comprendidos entre 1/2” y 6”. b) Gama No Tenaris Tubocaribe: Tubería Conduit EMT diámetros menores a 1/2” y mayores a 4”, Conduit IMC de diámetros menores a 1/2” y mayores a 4”, y Conduit RMC (Rigid) de diámetros menores a 1/2” y mayores a 6”.” Frente a lo anterior, es muy importante aclarar y explicar la forma como se debe tener en cuenta la distinción para identificar el producto objeto de investigación por diámetro nominal y/o exterior. f. En el anexo 17 de la solicitud de apertura de la investigación se indica que “Cuando la cantidad declarada está expresada en unidades de Longitud (piezas), se procede a calcular el peso teórico para cada producto identificado en la descripción completa, buscando los valores del diámetro y la especificación de clúster (EMT, IMC, RMC) correspondiente a cada producto, desde las fichas técnicas por producto Familia, para obtener así el peso mínimo del tubo expresado en kilogramos, el resultado se multiplica por las piezas declaradas en cada producto y se divide entre 1.000, obteniendo el peso teórico en toneladas.” Al respecto, adjuntar la tabla de conversión en la cual se identifican los diámetros con su respectivo peso para las tuberías objeto de investigación y que se usa específicamente para el ejercicio de depuración de las declaraciones de importación. De igual manera, a través de ejemplos, explique la utilización de la metodología propuesta para determinar el producto objeto de investigación. 4. Análisis de daño Aportar para las variables que a continuación se relacionan, información semestral para el periodo comprendido entre el II sem 2021 y I sem 2024, correspondiente a cada una de las referencias de la tubería Conduit (MT, IMC y RMC) y por cada uno de los diámetros nominales y espesores de pared. Tener en cuenta que, en razón a que la producción se encuentra repartida entre TENARIS y COLMENA, se debe diligenciar un cuadro por empresa, según corresponda, de acuerdo con las tabas incluidas en el oficio adjunto. Finalmente, la información antes descrita deber ser aportada en sus versiones

	Confidencial y Pública, con la respectiva justificación de confidencialidad.
